

Economical A4 Multifunction LED UV Printer**\$1200-1500**

Economical A4 Multifunction LED UV Printer – Affordable and Versatile Custom Printing Solution

The Economical A4 Multifunction LED UV Printer is the ideal choice for businesses looking for a cost-effective and high-quality solution for printing on a wide variety of materials. Compact yet highly versatile, this printer is designed to support multiple applications, from personalized gifts and promotional items to customized merchandise. It delivers precise, vibrant prints on both flat and rigid surfaces, including metal, glass, plastic, wood, acrylic, and more.

With advanced LED UV printing technology, this printer instantly cures ink, ensuring durable and long-lasting prints that resist fading, scratching, and wear. Whether you're printing custom phone cases, signage, photo frames, or promotional materials, the Economical A4 Multifunction LED UV Printer ensures top-tier quality and reliability, with vivid colors and sharp details on each product.

This printer is engineered for ease of use and offers an economical price point, making it a perfect choice for small to medium-sized businesses looking to expand their product offerings without a large upfront investment. The user-friendly design ensures smooth operation with minimal setup time, making it an excellent entry-level solution for those new to UV printing technology.

Unlock endless creative possibilities and take your business to the next level with the Economical A4 Multifunction LED UV Printer—your go-to solution for affordable, durable, and high-quality custom printing.

Key Advantages:

1. **White Ink Printing Capability:** Unlike flatbed printers, which lack white ink (unless using textile ink), this UV printer can print in white ink, expanding the range of colors and effects you can achieve.
 2. **No Coating Required:** The UV printer can print directly onto materials without needing any pre-coating. In contrast, flatbed printers require a coating for most materials, which may cause printed images to scratch or wear off quickly.
 3. **Embossed Effect Printing:** The UV printer can create a unique embossed effect on prints, offering added texture and depth to your designs, something flatbed printers cannot do.
 4. **Instant Drying:** Once printed, the UV ink dries immediately, ensuring quicker turnaround times. Flatbed printers, on the other hand, cannot dry ink as rapidly, potentially leading to delays.

Product Details:

- Model Number: GF33U4
- Ink Type: LED UV Ink
- Printer Head: EPSON R290/330 Series or advanced L805 head
- Ink Colors: Cyan, Magenta, Yellow, Black, White, White
- Print Size: 16 x 30 cm
- Print Thickness: 0-50 mm
- Print Technology: Non-touch piezoelectric inkjet printing
- Protection: Built-in max height position to help control print height
- Height Adjustment: Knob-based system for easy operation and protection of the printer head
- Print Speed: A4-size borderless photo in as fast as 163 seconds
- Print Weight: 0-15 kg
- Ink System: CISS (Continuous Ink Supply System) for easy refilling
- Tray: Durable metal tray
- Working Conditions: Temperature: 20°C-30°C, Humidity: 40%-70%
- Print Software: PhotoPrint, Acro RIP (compatible with Windows 2000, XP, Win 7/8/10)
- Connection: USB 2.0 Port
- Power Requirements: 110-220V
- Image Format Compatibility: TIFF (RGB & CMYK), BMP, PDF, EPS, JPEG, JPG, etc.
- Computer Compatibility: Windows XP, Windows 2000/2003, 7/8/10
- Printer Weight: 26 kg (32 kg with packaging)
- Printer Dimensions: 650 x 470 x 430 mm (780 x 580 x 550 mm with packaging)

This Economical A4 Multifunction LED UV Printer is an excellent investment for any business looking to venture into custom printing on various materials without compromising on quality or performance.
