Roll Laminator Single Side Laminating Machine

Specifications:: F35LM

\$0.00

Ex Tax:: \$0.00

Single-Sided Electric Laminator - Professional Lamination for Crystal Stickers, Photo Books & More

The Single-Sided Electric Laminating Machine is a high-efficiency laminator built for precision surface finishing across a wide variety of media. Whether you're producing crystal clear stickers, photo book pages, custom nameplates, or branded labels, this machine delivers clean, durable, and professional results every time.

Compatible with both hot and cold lamination films, it provides smooth, bubble-free finishes on glossy, transparent, and textured surfaces. Its electric motor ensures consistent pressure, enhancing productivity and eliminating the challenges of manual laminating.

Designed with ease of use in mind, this laminator is perfect for custom print shops, craft studios, signage producers, and small home-based businesses looking to elevate the quality of their final products.

Available Versions:

- Fixed Speed - Simple and reliable for consistent jobs
- Adjustable Speed - More control for varied media
- Adjustable Speed with LCD Screen - Full visibility and precision during operation

Key Features:

- Dual Lamination Support:
Handles both hot and cold lamination, suitable for various films and printed materials.
- Electric Operation:
Delivers uniform pressure and seamless lamination—no manual cranking or inconsistent results.
- Wide Application Range:
Ideal for crystal stickers, photo books, labels, nameplates, art prints, and more.
- User-Friendly Controls:
Easy-to-use interface with temperature and speed adjustment options depending on the version.
- Compact & Efficient:
Space-saving design fits on desktops while offering commercial-level performance.

Why Choose This Laminator?

If you're looking to boost the quality of your products without investing in bulky industrial

equipment, this machine strikes the perfect balance between professional results and compact usability. Whether you're sealing a sticker, protecting a document, or enhancing a printed photo, you'll get a clean, polished finish—every time.

Technical Specifications:

- Laminating Width: Up to 35 cm
- Max Laminating Thickness: 0-6 mm
- Speed: Up to 1.2 meters per minute
- Preheat Time: 3-4 minutes
- Temperature Range: 0-200°C
- Power: 600W
- Voltage: 110-220V
- Dimensions: 54 × 26 × 28 cm
- Weight (with packaging): 11 kg

Upgrade your lamination capabilities with this Single-Sided Electric Laminator—designed to streamline your workflow and deliver polished, professional-quality finishes for a wide range of printed applications.
